

GreenBuild

GREEN BUILDING PROVIDER

As part of our commitment to providing industry-leading services, support, and education, BER is accredited to provide services for the U.S. Green Building Council, Enterprise Green Communities, and ENERGY STAR Multifamily New Construction (MFNC) programs. These accreditations, along with our decades of HERS Providership experience, allow BER to offer streamlined services, tech support, and quality assurance, which equals time and money savings for our clients.

ENERGY STAR MULTIFAMILY REVIEW ORGANIZATION (MRO)

An MRO is a third-party organization recognized by the EPA to provide oversight for multifamily projects pursuing certification under the Prescriptive or ASHRAE paths of the new ENERGY STAR Multifamily New Construction (MFNC) program. To be recognized as an MRO, an organization must demonstrate impartiality, a commitment to a high level of quality assurance, and nationwide reach.

Considering BER's expertise and track record with the ENERGY STAR programs nationwide over a decade, BER is the clear choice for your MFNC project. BER's experts are here to guide you from the design phase through project completion.

LEED FOR HOMES PROVIDER

BER is a USGBC accredited LEED for Homes (LFH) Provider. This accreditation furthers our mission of offering our clients comprehensive Provider services. As your LEED for Homes Provider, BER will provide project support right from the outset, and can register projects with the USGBC on your behalf.

BER, with decades of green building experience and knowledge, has staff experts to help you and your team accomplish LEED for Homes Programs requirements at the highest level of industry standards and in the most productive and efficient way possible.

ENTERPRISE GREEN COMMUNITIES TA PROVIDER

Enterprise Green Communities (EGC) leads the national effort in improving the health, economic, and environmental benefits of sustainable construction practices to low-income families.

BER is an EGC Technical Assistance (TA) Provider that has been vetted as a consultant and qualified expert in topics related to the design, development, and construction of energy-efficient, environmentally friendly, and safe affordable housing. BER's expertise in project tracking and facilitating cross-team communication ensures all of these objectives are accomplished.

With decades of experience in the sustainable, energy efficient, and healthy home arena, BER's ability to execute the EGC program makes the project certification process easier, more professional, and more cost effective for our clients.
